

Positive feedback that I agree with	Positive feedback that I do not agree with	Negative feedback that I agree with	Negative feedback that I do not agree with
ICT program was a right choice for me	My website looks professional	4/5 score for "professionalism of the presentation"	-
Humor		Speaking technique	

I found the website-making task enjoyable. I have never done anything like this before, but I learned a lot. I expected more lectures on that topic, but the-self study approach was fair too. I like the way that I need to look up for the information I require. The pitch was quite stressful for me because this was the first time I had to make a presentation online. It is hard to speak in English when there is pressure on me. I am looking forward to continuing this path in programming; I find it interesting so far.

MENU

**The study programme suits my personality because:**

- Like creating new things
- Logical thinking
- Endurance
- Broad-minded
- Hard-working
- Communicative

**The HBO level suits me because:**

- Interest in ICT
- Improve my knowledge
- Work on real-life projects
- Like offline classes

## Website

In the next 5 minutes, mark the following subjects by asking questions. Students can include examples in their presentation. If necessary, provide feedback for the student below tables.

### 1. Pages

Website is obviously missing important content	All necessary pages are there with content	Content in all the pages is clear and meaningful
--	--	--

### 2. Personal dashboard

Does not exist or does not meet requirements	Consists of a table with all courses and related exams in a structured way	Also contains links to useful websites like Learn.hz, study progress page in my.hz
--	--	--

### 3. Development environment

Very basic editor, no web server, no easy way to work in a folder with multiple files	Good code editor. Website hosted from computer. Can easily work with multiple files in a folder	Good code editor, website hosted on URL or IP address. Can easily work with multiple files in a folder
---	---	--

### 4. Code quality

Code is a mess	Meaningful naming of files and code. Code is generally clear. Care for indenting, capitalisation and structure of code and files.	Code and files are well structured. Great care has been taken for good naming and indenting.
----------------	---	--

### 5. Adaptability

*Big changes like colour of text, colour of background, font size of all text, etc.*

It's hard and complex to change i.e. text colour	Change of i.e. text colour can be done within a minute	Change of i.e. text colour can be done within seconds

# Evaluation of pitch and website

Student name	<del>Sb</del> Sangi Zehe
Evaluated by	Loeh

## Pitch

In the pitch of about 5 minutes, mark the following four categories and provide feedback for the student.

### 1. Creativity

On a scale of 1 to 5, how much do the website and pitch exhibit creativity? Think of original points of view, used resources, layout and design, and other "wow" factors.

1	2	3	4	5
---	---	---	---	---

### 2. Presentation

On a scale of 1 to 5, how professional is the student? Think of body composure, speaking technique, timing, use of resources, clothing, manner of presenting.

1	2	3	4	5
---	---	---	---	---

### 3. Professionality

On a scale of 1 to 5, how professional does the website look? Is it clear to read and to look at? Is it understandable and usable?

1	2	3	4	5
---	---	---	---	---

### 4. Motivation

On a scale of 1 to 5, how motivated does the student appear for the ICT domain and programme?

1	2	3	4	5
---	---	---	---	---

## Feedback

Obviously, the choice for this programme was thought out very ~~was~~ thoroughly. There's also a lot of subtle humor in there, nice! I admire your goals and reasoning. Don't give up on them easily!
